

Climate Search

Work with a partner or small group to walk around your school (inside and outside) and look for things that help people or the planet.

You will look for things that

“We do to stop climate change getting worse”

This is called Mitigation

(e.g. turning off lights, recycling)

“We do to stay safe when the climate changes”

This is called Adaptation

(e.g. shade, managing rainwater)

When you find something:

- Tick it off
- Talk about how it helps
- Decide if it is mitigation, adaptation, or both by placing an **M** or an **A** by the item
- Think: could this inspire a Climate Week idea?

Climate Item to find	Item Found?	Mitigation or Adaptation?	Idea it could inspire
Example: Lights turned off when not needed	✓	A	No Lights Challenge
