

Manor Park Curriculum Explorers

Primary 2

Learning across subjects and in different ways

- We go on trips near our school. We could go to the skate park, learn how to skate and then draw our own skateboards.
- We learn how to look after plants and take care of what is around us. We learn how to recycle and about nature, as it is good for us.

The learning we do

- When we come into school in the morning, we do calm activities like Playdoh.
- We do our P.E. outside. We play hide and seek, tig n' tag and football.
- We learn about our body parts. We learn about healthy eating through trying different fruit and veg.
- We learn maths through games, drawing and art.
- We go swimming together.
- We do art outside. We draw on the ground.
- We have slides, swings and climbing frames to play on.
- We work in pairs.
- We learn about sleep – how it makes our brain grow and how we can get enough.
- We get to try out different instruments.

The experience of being at school

- All children like going to school. All children and adults are happy at our school.
- Playing encourages us to learn. We need more time to play. This could be in the classroom, in the playground or after school.
- We still have buddies. They show us where we can chill in the school and help if we are angry.
- Adults play with us and take care of us. They smile, give us cuddles and tell us they love us.
- In our corridor, the toilets and sinks fit us, so we can learn how to use them.
- We have a Dark Den in our class or sad corner, where we can cheer up when we are down.
- Our school is bully-free.
- We get time-out from tasks when we need it.

How we grow and flourish

- We learn how to play with other children, so they feel happy and enjoy life.
- We learn how to help others.
- We are happy because we feel safe.
- We can bring our own teddy and things we love from home into school to show everyone.

Children's Parliament
giving ideas a voice
